SUMMARY

Data Analyst with experience in data analysis, data quality validation, reporting automation, and stakeholder collaboration. Strong expertise in SQL, Excel, Python, and Power BI for extracting insights from large datasets and improving operational efficiency. Proven ability to perform root cause analysis, data validation, and business requirement documentation. Experienced in working across business and technical teams to deliver data-driven solutions. Familiar with Agile methodologies, data pipelines, and data governance concepts including data lineage, controls, and quality management.

SKILLS

Data Analysis & Analytics: SQL, Python, Excel, Statistical Analysis, Data Validation, Root Cause Analysis, Data Quality Controls

Business Analysis: Requirements Gathering, BRD, FRD, Gap Analysis, User Stories, Stakeholder Management, Process Documentation

Data Visualization & Reporting: Power BI, Excel Dashboards, Reporting Automation, KPI Reporting, Trend Analysis

Data Engineering & Governance Concepts: Data Pipelines, Data Lineage, Metadata Management (basic), Data Mapping, Data Cleaning

Tools & Technologies: SQL, Python, Power BI, Excel, Git, GitHub, Jupyter Notebook, Azure, Databricks

Agile & Project Management: Agile Methodology, JIRA (basic), Sprint workflows, Requirement tracking

Soft Skills: Communication, Stakeholder Coordination, Analytical Thinking, Problem Solving

PROFESSIONAL EXPERIENCE

Associate - WNS Global services

Dec 2024 - Jan 2026

- Performed data quality validation, reconciliation, and root cause analysis to ensure reporting accuracy
- Collaborated with business stakeholders to gather reporting requirements and translate them into data solutions
- Created MIS reports, dashboards, and automated Excel reports supporting business decision making
- Investigated data issues including inconsistencies, validation failures, and reporting discrepancies
- Assisted in improving operational workflows through data-driven insights and recommendations
- Participated in requirement discussions, documented process flows, and supported implementation activities

Full Stack Development python internship, V3 Data Solutions

Jan 2022 - April 2022

- Developed data-driven applications using Python and SQL
- Designed and optimized SQL queries for efficient data extraction and validation
- Cleaned and transformed raw datasets for analysis and reporting
- Supported exploratory data analysis and reporting preparation
- Documented technical workflows and data processes
- Assisted in debugging, testing, and validating backend data logic

PROJECTS

- Amazon Sales Dashboard (Power BI)
 - Extracted and analyzed sales datasets using SQL
 - Built interactive dashboards to track KPIs and performance trends
 - Identified key drivers impacting sales performance through data analysis
 - Delivered actionable insights supporting business decision making

- COVID - 19 Data Analysis (Python)
 - Cleaned and processed large datasets using Python and Pandas
 - Performed statistical analysis to identify trends and patterns
 - Created visualizations to present analytical findings
- Real Estate Data Analysis (Excel)
 - Conducted exploratory data analysis on real estate pricing datasets
 - Built dashboards and reports highlighting investment trends
 - Applied statistical analysis techniques for business insights

EDUCATION

B. E. Computer Engineering - Pune University (2023)

Diploma in Computer - State Board (2020)

CERTIFICATIONS

- Core Python – Udemy
- Data Analysis (Learning) – Udemy
- AI Engineer – Udemy
- Generative AI Foundations – UpGrad
- Python Programming – Simplilearn

ADDITIONAL

- Strong analytical and problem-solving skills
- Experience working with large datasets and reporting systems
- Understanding of data governance and data quality practices
- Actively learning advanced SQL, Python, Azure, and Databricks
- Actively creating educational content on Data Analysis
