SUMMARY

Highly motivated Data Analyst with hands-on experience in SQL, Python, Power BI, and dashboard development. Strong foundation in data pipelines, statistical analysis, and data visualization. Experienced in data cleaning, validation, reporting, and cross-functional collaboration. Currently building skills in PySpark, Azure, Databricks, and Tableau for scalable analytics solutions. Seeking Data Analyst / Software Engineering opportunities to deliver actionable insights on large datasets.

SKILLS

Big Data & Cloud: PySpark, Databricks, Microsoft Azure

Data Visualization: Tableau, Power BI, Excel Dashboards

Programming: Python, SQL, Django

Version Control & Tools: Git, GitHub, Jupyter Notebook

Analytics: Statistical Analysis, Root Cause Analysis, Trend Analysis

Data Engineering Basics: Data Pipelines, Data Cleaning, Gold/Silver Layer Concepts

Soft Skills: Analytical Thinking, Logical Reasoning, Communication, Decision Making, Time Management

PROFESSIONAL EXPERIENCE

Associate - WNS Global services

Dec 2024 - Jan 2026

- Analyzed large operational datasets to identify process gaps and improve turnaround time.
- Prepared MIS and performance reports using MS Excel (Pivot tables, formulas) to support business decisions.
- Performed data validation, quality checks, and reconciliation to ensure accuracy of reporting outputs.
- Collaborated with stakeholders to understand reporting requirements and implement workflow improvements.
- Supported system readiness and enhancement activities by validating outputs and documenting processes.
- Delivered actionable insights that improved customer experience and operational efficiency.

Full Stack Development python internship, V3 Data Solutions

Jan 2022 - April 2022

- Built data-driven applications using Python and SQL.
- Designed databases and developed queries for data extraction and processing.
- Cleaned large datasets and performed exploratory data analysis.
- Assisted in building dashboards and documenting technical workflows.
- Supported testing and debugging of backend data logic.

PROJECTS

- Amazon Sales Dashboard (Power BI)
 - Built interactive dashboards for KPI tracking and trend analysis.
 - Extracted datasets using SQL and performed root cause analysis on sales performance.
 - Applied statistical techniques to derive insights.
- COVID - 19 Data Analysis (Python)
 - Cleaned and processed datasets using Pandas.
 - Performed statistical summaries and visualized trends.
- Real Estate Data Analysis (Excel)
 - Conducted exploratory analysis on pricing datasets.
 - Generated reports highlighting investment patterns.

EDUCATION

B. E. Computer Engineering - Pune University (2023)

Diploma in Computer - State Board (2020)

CERTIFICATIONS

- Core Python – Udemy
- Data Analysis (Learning) – Udemy
- AI Engineer – Udemy
- Generative AI Foundations – UpGrad
- Python Programming – Simplilearn

ADDITIONAL

- Familiar with big data concepts and scalable analytics workflows
- Actively practicing PySpark, Azure, Databricks, and Tableau
- Strong problem-solving mindset and team collaboration skills
- Actively creating educational content on Data Analysis
