SUMMARY

Data Analyst of experience in SQL-based data transformation, reporting, and analytics. Hands-on with Python, Excel, Power BI, and relational databases for building clean analytical datasets and dashboards. Experienced in writing optimized SQL queries, performing data quality checks, supporting BI use cases, and collaborating with stakeholders to translate business requirements into structured data models. Actively learning DBT, dimensional modeling, and modern data warehouse practices.

SKILLS

Data Transformation & Analytics: SQL, Python, Excel, Power BI

Data Modeling: Fact & Dimension Tables, Star Schema (Learning), Analytical Dataset Design

Databases / Warehouses: SQL, SQLite

Version Control & Tools: Git, GitHub, Jupyter Notebook

Data Quality: Validation Checks, Duplicate Handling, Null Treatment, Reconciliation

Other: Documentation, MIS Reporting, Dashboard Development

Soft Skills: Analytical Thinking, Logical Reasoning, Communication, Decision Making, Time Management

PROFESSIONAL EXPERIENCE

Associate - WNS Global services

Dec 2024 - Jan 2026

- Developed SQL queries to extract, transform, and prepare datasets for reporting and BI dashboards.
- Built clean analytical tables by applying business rules, data validation, and transformation logic.
- Performed data quality checks including null handling, reconciliation, and consistency validation.
- Optimized Excel and SQL workflows to improve reporting efficiency.
- Collaborated with business stakeholders to understand data requirements and deliver structured reports.
- Supported downstream analytics use cases through Power BI dashboards and KPI reports.
- Maintained documentation of data processes and reporting logic.

Full Stack Development python internship, V3 Data Solutions

Jan 2022 - April 2022

- Designed SQLite databases and created SQL queries for data extraction and transformation.
- Cleaned and transformed raw datasets using Python for analytical consumption.
- Created basic fact-style reporting tables for dashboards.
- Used GitHub for version control and project documentation.
- Supported backend data pipelines and testing activities.

PROJECTS

- Amazon Sales Dashboard (Power BI)
 - Built analytical datasets using SQL and Excel for sales reporting.
 - Designed KPI dashboards based on revenue and product performance.
 - Created dimension-style views for product and region analysis.
- COVID - 19 Data Analysis (Python)
 - Transformed raw datasets using Pandas.
 - Performed exploratory and statistical analysis.
 - Generated trend-based insights for reporting.

- Real Estate Data Analysis (Excel)
 - Modeled pricing datasets and created summary tables.
 - Generated reports highlighting regional trends.

EDUCATION

B. E. Computer Engineering - Pune University (2023)

Diploma in Computer - State Board (2020)

CERTIFICATIONS

- Core Python – Udemy
- Data Analysis & AI – Udemy
- Generative AI Foundations – UpGrad
- Python Programming – Simplilearn

ADDITIONAL

- Hands-on with Excel, SQL, Power BI dashboards
- Actively learning advanced statistics and analytics
- Creating educational content on Data Analysis
